RIVERTOWN RETHINKING URBAN RIVERS

CONTRIBUTORS

Andrea Misako Azuma, Uwe Steven Brandes, Robert Gottlieb, Mike Houck, Paul Stanton Kibel, Ron Love, Richard Roos-Collins, Melissa Samet, Christopher Theriot, Kelly Tzoumis

Today's urban riverfronts are changing. The decline of river commerce and riverside industry has made riverfront land once used for warehouses, factories, and loading docks available for open space, parks, housing, and nonindustrial uses. Urban rivers, which once functioned as open sewers for cities, are now seen as part of larger watershed ecosystems. *Rivertown* examines urban river restoration efforts across the United States, presenting case studies from Los Angeles, Washington D.C., Chicago, Salt Lake City, and San Jose. It also analyzes the roles of the federal government (in particular, the U.S. Army Corps of Engineers) and citizen activism in urban river politics. A postscript places New Orleans's experience with Hurricane Katrina in the broader context of the national riverside land-use debate.

Each case study in *Rivertown* considers the critical questions of who makes decisions about our urban rivers, who pays to implement these decisions, and who ultimately benefits or suffers from these decisions. In Los Angeles, for example, local nonprofit and academic research groups played crucial roles, whereas Chicago relied on a series of engineering interventions. Some cases — such as the innovative cooperative framework adopted to address problems in the Guadalupe River watershed — offer models for other areas. In each case, authors evaluate the ecological issues and consider urban river restoration projects in relation to other urban economic and environmental initiatives in the region. *Rivertown* is a valuable resource for urban planners and citizen groups as well as for scholars.

Paul Stanton Kibel is Director of Policy West, a public policy consultancy, and an environmental and water rights attorney with Fitzgerald Abbott & Beardsley. He is Adjunct Professor at Golden Gate University School of Law, where he also directs the City Parks Project, and teaches water policy at the Goldman School of Public Policy, University of California, Berkeley. He is the author of *The Earth on Trial: Environmental Law on the International Stage*.

Publication: September 2007 • 6 x 9 • \$22.00/£14.95 paper • 232 pages • 18 illustrations
